### 2. Citations and explanations:

Documents cited in the International Search Report:

D1: US6199920 B1 D2: US5511827 A D3: SE512411 C2

The cited documents represent the general state of the art. The invention defined in claims 1-10 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed device for connecting two rigid tubular objects comprising a male and a female part. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-10 is novel and is considered to involve an inventive step. The invention is industrially applicable.

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/SE2004/001595

Box No.	VIII	Certain	observations on	the international	application
DOX NO.	V 111	Certam	ODSCI VALIDIES OF	THE INTELLEGENCE	. appneac

The following observations on the clarity of the claims, description, and drawing or on the question whether the claim are fully supported by the description, are made:

The invention as defined in claim 6 is not clear because it is not obvious what "...the inner diameter of the remaining portion (2b)..." (line 24) is referring to, as on which part the remaining portion is positioned.
